Office Action Summary	Application No. 10/527,353	Applicant(s) UCHIDA, SHINJI	
	Examiner SANJAY CATTUNGAL	Art Unit 3768	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-16 are rejected under 35 U.S.C. 102(e) as being anticipated by anticipated U. S. Patent No. 6,882,872 to Uchida et al.

3. The applied reference has a common inventor and assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention “by another,” or by an appropriate showing under 37 CFR 1.131.

4. Regarding Claims 1 and 4-16 Uchida teaches a biological information measuring apparatus and method comprising: a light source (Fig. 1 element 1); a living body measuring optical element of applying light emitted from said light source to a living body and receiving light returning from said living body (Fig. 1 element 17); a light detector of detecting said light received by said living body measuring optical element

(Fig. 1 element 13); and a reference light guide capable of guiding the light applied by said living body measuring optical element so that the light can be returned to said living body measuring optical element, when the reference light guide is in a state of being arranged in contact with said living body measuring optical element. (Col. 5 lines 10-15)

5. Regarding Claim 2 and 3, Uchida teaches a calculation section of providing biological information of said living body through calculation based on the light returned from said living body and detected by said light detector, wherein the calculation section detects that at least one of said light source, said living body measuring optical element and said light detector abnormally functions based on the light detected by said light detector in a state where said light guide is arranged in contact with said living body measuring optical element. (Fig. 1 element 14)
